

## INTRODUCTION

2021 the 4th International Conference on Automation and Mechatronics Engineering (ICAME 2021) is organized. It will be taken place in Kuala Lumpur, Malaysia during May 8-10, 2021. Nowadays, Automation and Mechatronics Engineering play an increasingly important role in both control and engineering applications. In the real world, the environment is complex and dynamics. The main goal of ICAME 2021 is to address latest original results in advanced intelligent control of automation systems, including both theoretical advances and practical implementations, which are becoming more and more popular in industry and in our daily lives. ICAME will provide a premier interdisciplinary platform for scientists, researchers, industry leaders, engineers and educators throughout the world to present and discuss the most recent innovations, trends, concerns, as well as practical challenges encountered, and streamline solutions in the fields of Automation and Mechatronics Engineering.

## PUBLICATION INFORMATION
